What Does Calacatta Elegant Extra Quartz Offer To My Home?

Your living space is sacred. It is your domain and the aesthetic is arranged through your tastes and preferred style. The Calacatta Elegant Extra is a stone that provides you with multiple interior options and various projects to completely recreate your home. In this case, quartz is a versatile material that will match extravagant palettes and blends well with other applications.

Homeowners should remind themselves that quartz is not heat-resistant. Since the stone cannot be used under extreme circumstances, the kitchen is not an optimal space in the home to fabricate and install the Calacatta Elegant Extra. One of the main advantages to installing this countertop is how easy it is to maintain the condition. In fact, cleaning the surface is so easy that homeowners can simply use a cloth to gently scrub out spotty areas and stains.

You might also have to consider the fact that one finish may need more care and maintenance than the other finishes available with this installation. The honed surfaces will show fingerprints and might show other signs of daily usage. However, it is fortunate that Calacatta Elegant Extra is simple to clean. Any blemish that you're uncomfortable with can be easily resolved by using surface care products. Be wary of spilling any harsh chemical on the surface, this includes drain cleaners, paint strippers, oven cleaning agents, or bleach.

Which Room Should I Install The Calacatta Elegant Extra?

It's rhetorical to mention that the kitchen is an unlikely area with which the Calacatta Elegant Extra will be installed. Due to the possible damages that can occur under the duress of heated objects, it's best to install the quartz in an environment without such risks. The bathroom is probably the ideal space for a homeowner

to install the stone.

If you are astute with this disadvantage, you could also implement your quartz into a modern kitchen setting. Use either a hot pad or a trivet to place your hotter objects on the surface or you may have to replace the stone entirely.
